

Alex Morgan

Berlin, Germany | alex.morgan@example.com | linkedin.com/in/alex-morgan | github.com/alexmorgan

PROFILE

Electrical Engineering master's student with hands-on experience in Python automation, REST APIs, JSON data processing, Git, and technical prototyping. Interested in AI workflow automation, industrial software, and reliable data pipelines.

TECHNICAL SKILLS

Programming	Python, JavaScript, SQL
Automation	n8n, REST APIs, Webhooks, JSON
Tools	Git, Docker, Linux, Postman
Data & AI	Pandas, data analysis, prompt design, LLM API integration

PROJECT EXPERIENCE

AI Resume Analyzer | n8n, JavaScript, PDF Processing

- Built an n8n workflow that accepts a PDF resume and target job description through a form.
- Extracted resume text, validated inputs, compared job-relevant skills, and generated a structured Markdown report.
- Added a downloadable report output with Convert to File and documented the workflow for GitHub release.

Industrial Data Automation Project | Python, REST API, Docker

- Created a Python service that collected test data from a REST API and normalized JSON payloads.
- Stored processed records in SQL and containerized the service with Docker for reproducible deployment.
- Added logging and validation checks that reduced malformed records during testing.

EDUCATION

M.Sc. Electrical Engineering | Technical University of Berlin | 2024 - Present

Focus areas: robotics, embedded systems, automation, sensing, and applied machine learning.

EXPERIENCE

Working Student - Engineering Support | Example Automation GmbH | 2025 - Present

- Supported testing and documentation of automation workflows and electronic prototypes.
- Used Python and Git to analyze measurement data and maintain reproducible scripts.
- Collaborated with engineering teams to investigate failures and document corrective actions.
